

The Volition Biobank

Institution	Condition	Sample Collection	Cohort	Timing
Early Detection Research Network of the U.S. National Cancer Institute	Colorectal	9,000 Prospective, 4,600 Retrospective	13,500 + Screening Population	Ongoing to 2020
National Taiwan University	Colorectal	Prospective	5,000 Asymptomatic Population	Ongoing to 2021
National Taiwan University	Colorectal	Prospective	2,000 Symptomatic Patients	Ongoing to 2021
Hvidovre Hospital, University of Copenhagen	Colorectal	Prospective	14,000 Screening Population	Collection completed and analysis ongoing
Hvidovre Hospital, University of Copenhagen	Colorectal	Prospective	30,000 Screening Population	Collection completed and analysis ongoing
Hvidovre Hospital, University of Copenhagen	Colorectal	Retrospective	4,800 Symptomatic Patients	Collection completed and analysis ongoing
National Taiwan University	Lung	Prospective	1,200 Subjects	Expected to start mid-2019 to 2021
German Cancer Research Center (DKFZ)	Pancreatic	Retrospective	750 Subjects	Collection completed and analysis ongoing
University of Bonn	27 Most Prevalent Cancers	Prospective	4,500 Subjects	Collection completed and analysis ongoing

Proof of Concept

Condition	Sample Cohort	Expected Data Release
Colorectal	N = 225	Q2 2019
Colorectal	N = 552	H1 2019
Colorectal	N = 352	H2 2019
Lung	N = 76	Q1 2019
Lung	N = 152	H1 2019
Prostate	N = 120	H1 2019
Prostate	N = 100	H2 2019
Pancreatic	N = 100	H2 2019
Head & Neck	N = 200	H2 2019
Endometriosis	N = 10 (x 5 collections)	H2 2019
Endometriosis	N = 300	H2 2019
